

Project 1 – Personal Web Page:

Goal:

Learning to add and modify content to a web page.

Instructions:

- Open the provided index.html file
- Add some contents about yourself in the proper places
- Change images to represent your content
- For this exercise, do not change CSS file. Only add or modify contents. Get inspiration from the page, and add a page with the same style.
- Make sure your contents are professional and nicely written, as you will use this personal page in your final portfolio page.

Requirements:

- Fill the social media links with proper links (or dummy links). Add other social media links you may have, and delete those that you do not have.
- Change the images in the image folder
- At least three paragraphs of contents in the Background and Goal sections

Evaluation:

- Submission (25%)
- Page integrity (links work, images are meaningful and right size) (50%)
- Content and esthetics (25%)

Comments:

- If you feel comfortable, you can modify CSS but pay attention to the esthetics and make sure your page is attractive and professional.
